PYRFORD PRIMARY SCHOOL

PUBLIC CONSULTATION

The building design is organised around an internal central street with vertical lightwells and rooflights that unify the ground and first floor into an integrated whole.

This street, which forms the heart of the scheme, allows for good passive supervision, informal group learning and break-out space. At each end of the street there are direct views out to the landscape beyond.

Intersecting with the street, is the entrance and library space which allow visual permeability for visitors and students arriving at the building.

We have situated the youngest years on the ground floor (Reception and Year 1) to enable free flow for students from inside to outside. We have situated the reception classrooms to the south façade, close to the main entrance, as is likely that parents of reception students may want to drop their students directly outside their classrooms. For Reception and Year 1 classrooms we have developed a suited classroom pair with integrated toilets and cloakroom. There are many sub-options for toilet configurations available to the client which can be found in the design appendices. However, the layouts shown in the main plans we believe utilise the space the most successfully. Allowing for maximise cloakroom and toilet space and minimising dead circulation areas.

PYRFORD PRIMARY SCHOOL

SITE PLAN

OUTLINE PROGRAMME

- Public Exhibition/Community Consultation: July 2015 – August 2015
- · Council engagement: July 2015 August 2015
- Submit Planning Application 17 August 2015 (target date)
- Planning Application Decision 20 October/17 November 2015
- Building Procurement/Construction/Handover: November 2015 – September 2016
- Demolition of Existing Buildings: September 2016
 November 2016
- Children's Centre Refurbishment: October 2016
 December 2016
- Complete Landscaping Works: October 2016 –
 December 2016

SITE PLAN

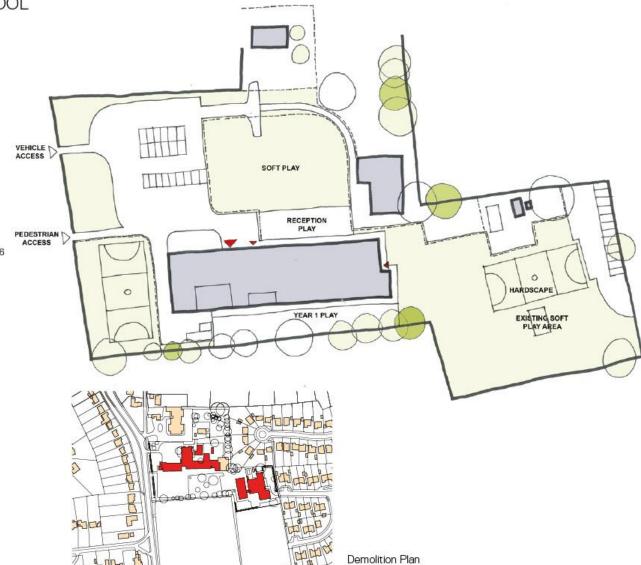

Maximise outdoor play alongside new building for Reception and Year 1

Maximise soft play areas on the footprint of the existing school

Tree removal kept to a minimum in support of planning considerations

Re-provision of netball courts at Sports England request

Existing car park and outdoor swimming pool retained

10 am GROUP WORKING IN THE STREET Schooleinful swingby 10em, and amonmyway to see the different activities in the school, and veich

At 12pm I am back in the classroom and we

HALL 'DINING SETTING'

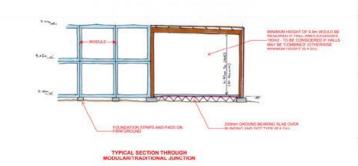

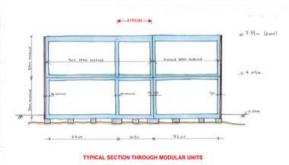

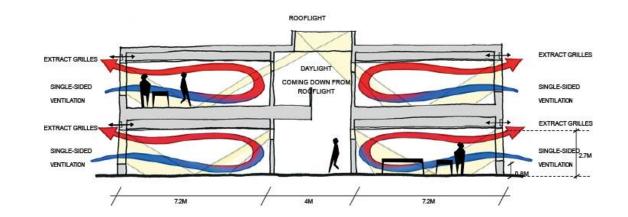

The Dining Hall and Main hall are located directly adjacent to the entrance to allow for good communal access. They are efficiently planned to allow for maximum flexibility for the space. Food can be served either in the main double height dining room or dining hall as we have server hatched shown on the two sides. Kitchen deliveries will be taken around to the north elevation space.

On the first floor all other classrooms are located. As the students are from Year 2 upward on the higher floor, the toilets are not located between classrooms but in two wet cores, which allow the floor plate to be configured more flexibly. The staff room and a senior office have been located on the first floor to improve passive supervision. All classrooms have a clear floor to ceiling height of 2.7m, with a window sill level of 800mm. All classroom spaces have a depth of 7.2m.

The spaces have dual aspect natural light due to the clerestory windows situated on the internal corridor spaces. All classrooms have 2sqm of storage space allocated to them (in addition to their briefed area) this storage can either be accessed directly from the classroom or from the corridor.
